

Product name : BENMAN BRAKE CALIPER
Colour : Red
Reference number : 33 871

Product description

High quality lacquer to highlight brake pads.

Product characteristics

Good filling property
Lasting gloss
Scratch free and shock proof
Resistant to petrol, chemicals and weather influences
Corrosion preventive
Dirt preventive
Non-fading (UV-resistant)
Excellent adhesion

Physical and Chemical Characteristics

Contents : 400ml
Base : Alkyd resin
Colour : Red
VOC-content : Approximately 79% w/w
Solid content : Approximately 21% w/w
Gloss : High gloss 90 at an angle of 60°
Coverage : 4 brake pads
Dust dry : After 30 tot 60 minutes
Tack free : After 3 hours
Hardened/re-sprayable : After 24 hours
Heat resistant : up to 110°C
Peak : up to 150°C

Usage

Before use, carefully read the directions on the packaging and act accordingly.

Pre Treatment

The surface should be clean, dry and free of fat. Remove loose old lacquer and rust and then sand. Apply a layer of primer. After drying, sand the base layer (grain 600).

Treatment

The can should have room temperature. Best application temperature 15 to 25°C. Before use, shake the can for 2 minutes and spray a sample. Distance to the surface to be treated approximately 25 to 30 centimeters.

Apply the lacquer in several thin layers. Before applying the next layer, again shake the can.

After use, clean the valve (turn can upside down and press the nozzle for approximately 5 seconds).

The drying time depends on the ambient temperature, the humidity of the air and the thickness of the lacquer applied.
